

Central Management Software

Features:

- Integrate systems of CCTV, Broadcast, TV wall matrix, Control, Alarm, Intercom, Access control, E-Map, Multimedia advertisement and more.
- Save cost of additional investment in control system, alarm system, E-Map control system and more.
- System can be easily upgraded to support broadcast system, access control system, multimedia advertisement, TV wall matrix and other systems.
- User-friendly and easy-to-operate GUI.
- H.264 video codec for real-time and clear video
- Embedded Windows OS for higher and stable performance.

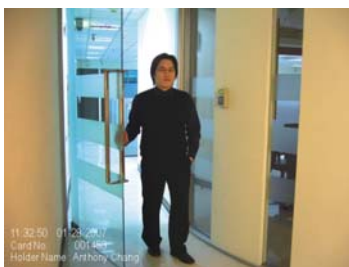

1. CCTV/E-Map

2. Alarm / Control / Intercom

3. Access Control

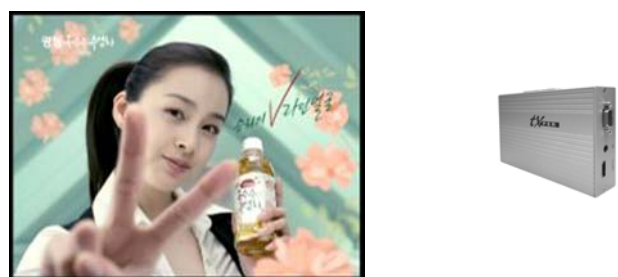

4. TV Wall Matrix with Control Keyboard

5. Broadcast (Network PA System)

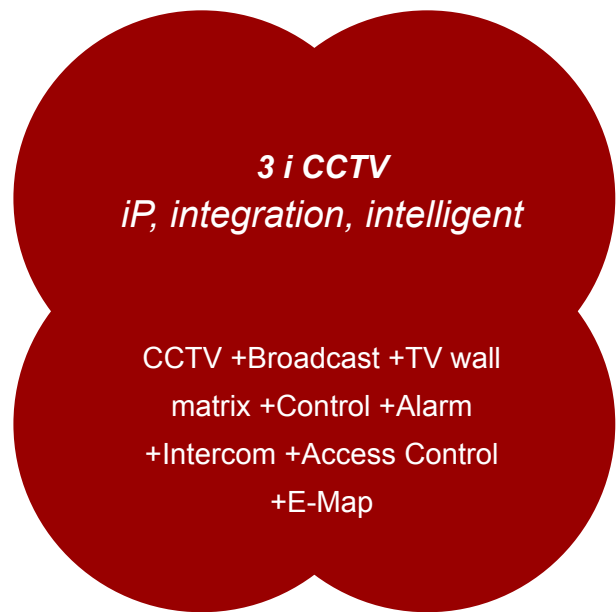

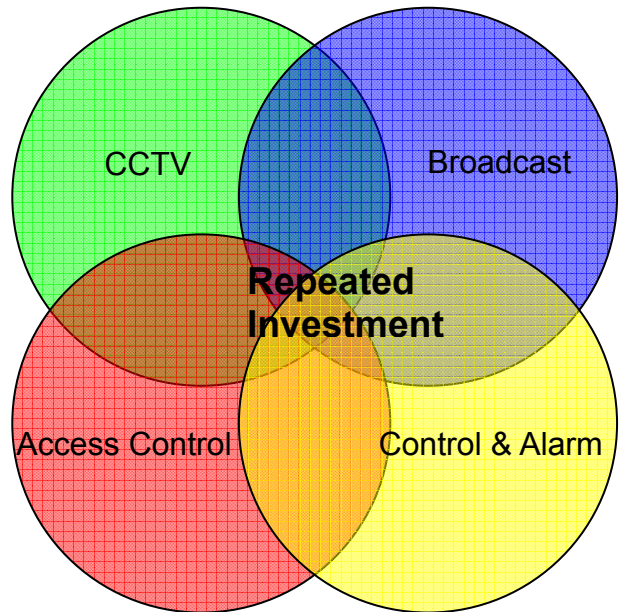

6. Multi Media Advertisement

Functions:

- User-friendly GUI, ease of operation
- Plug & Play Camera Control Design
- Triplex (Rec, Playback & Archive) simultaneously
- Triple-Monitor Operation
(Live, Playback, E-map, Video Wall, System Setup mode)
- Multi Video/ Audio/ GPIO Integrated streaming design
 - IP Camera, Video Servers, Video Decoders
 - Telexper nVR, Commander Stations
 - DAS/ NAS/ SAN and Tape Archive (optional, on request)
 - Manage all kinds of alarm sensors
 - Control electrical devices remotely (e.g. turn on/ off lighting)
 - Broadcast background music to the assigned areas
 - Live audio monitoring of selected area
- Unlimited Camera, nVR & Station Expansion
- Compatible with multi-codec, multi-brands IP products
 - M-JPEG, MPEG4, H.264 supported
 - More than 20 brands of IP camera and video encoder supported
- Powerful Live Monitoring
 - 16ch, 480 fps Live
 - Group view
 - 30fps @D1 resolution per every single camera
 - 1/4/9/10/13/16/25/36/64 cameras display on screen
- Alarm Call Live Monitoring
 - Pre-recorded digital alert message per every device
- User-friendly system configuration of REC such as
 - Frame rate (fps) & quality (compression & bit rate) adjustment
 - Multi-channel of video & audio REC
 - Alarm trigger/ schedule, alarm turbo, pre & post alarm
- Intelligent search playback (built-in indexed database)
 - Date/Time search
 - Motion search (up to four adjustable detection zones)
 - Smart search
 - Alarm search
 - Card number search (with ATM/Access Control/POS integration function)
- DVD & USB2.0 for archive (JPEG, AVI, Wav & proprietary format)
- User-friendly Alarm E-mail Notification
- Advanced user management administration; inc
 - Multi-user, multi-authority, hidden camera & etc..
- Work on 32-bit or 64bit Windows OS,
Min. spec: Dual Core CPU, 2G RAM
- 3G Phone Remote Viewer (Windows OS/ iPhone/ Android/ Symbian OS)

Other Components of Telexper IP System:

- Network Video Server (nVS series)
- Network Day&Night PoE Camera (nCAM series)
- Network Video Recorder (nVR series)
- Network Matrix Decoder (nMD series)
- Network Gigbit PoE HUB (nHub series)
- Network Alarm GPIO Expansion Module (nGPIO)

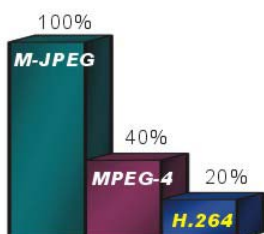

Applications:

- Financial Institution: Banks, postal offices, credit unions...etc.
- Public Construction: Highways, subways, power plants, reservoir...etc.
- Franchise: Convenient stores, malls, gas stations...etc.
- Convention centers, education institution, prisons, commercial buildings.
